OUR BUSINESS

Our roots lie in **structural engineering and industrial construction** for small and medium-sized businesses and in **civil engineering and roadbuilding**. Over the decades, WOLFF&MÜLLER has successfully adapted to the **changing demands of the market** and has grown to meet these challenges. Today, we are a fully integrated construction services provider.

CONSTRUCTION WORKS

- Office and industrial buildings
- Civil engineering
- Steel construction
- Building renovation
- Foundation construction
- Civil engineering and roadbuilding
- Government services

CONSTRUCTION AND RAW MATERIALS

- Silica sand and gravel
- Sand and gravel
- Vermiculite
- Asphalt

SERVICES

- Purchasing optimization
- Real estate services
- Human resource development
- Energy consulting
- Insurance consulting

OUR CONSTRUCTION SERVICES

OFFICE AND INDUSTRIAL BUILDINGS

Your partner for **all phases of the planning and construction process** – from **turnkey projects through individual trades to working with existing structures**: industrial, commercial, office, business and administration buildings, residential complexes, hotels, medical facilities ...

CIVIL ENGINEERING

Planning, design and construction of **complex, demanding challenging engineering structures**: infrastructure projects, bridges, tunnels, power plants.

STEEL CONSTRUCTION

Demanding **designs in steel**, from consulting through to production and erection: office, commercial and industrial buildings, complex engineering works, industrial plants, architectural steelwork, structural steelwork.

BUILDING RENOVATION

Asphalt paving, bridge renovation and building preservation.

FOUNDATION CONSTRUCTION

Excavations, foundations and civil engineering works down to depths of 40 m: excavation support, bored piles, anchors and injections, foundations, retaining walls, complete excavation works.

CIVIL ENGINEERING AND ROADBUILDING

Groundbreaking solutions for **infrastructure and transportation projects**: roads, infrastructure development, earthworks, canals, outdoor installations, railroads.

GOVERNMENT SERVICES

Construction projects for clients from **government departments**: structural engineering and industrial construction, roads, and associated services.

OUR E.P.I.-PRINCIPLE

We work hand in hand with our clients and construction partners to make our operations effective, partner-like and innovative.

Effective to save time, reduce costs, and improve construction quality.

Partner-like because successful construction projects are always a team effort.

Innovative because we plan and build today to meet the requirements and challenges of tomorrow.

GOTTLLOB MÜLLER PRINCIPLE

Our company founder, Gottlob Müller, was very aware that **sound management practices** and **responsible behavior** go hand in hand. This approach has been firmly anchored in everything we at WOLFF & MÜLLER do through the Gottlob Müller Principle:

In addition to **creating positive value added**, avoiding waste – whether it be nails, raw materials or energy – is very important to us. We want to live up to our responsibilities as a family business – towards our employees, clients and construction partners, but also to the environment and society.

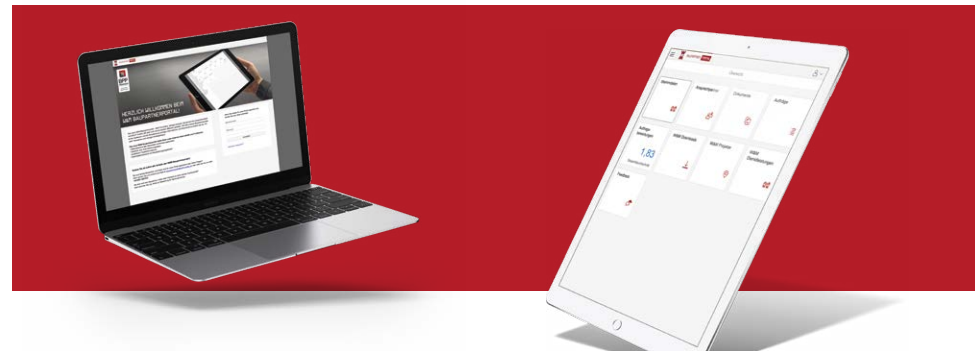

OUR CONSTRUCTION PARTNER PRINCIPLE

WOLFF&MÜLLER is committed to building and maintaining **trusting, long-term partnerships** with subcontractors. The goal of our Construction Partner Principle is to work with **experienced, well-coordinated teams** and **standardized processes** to ensure we can realize your projects as effectively, innovatively and with as little trouble as possible. For an optimum workflow is crucial for the **quality** and **economic viability** of any construction project.

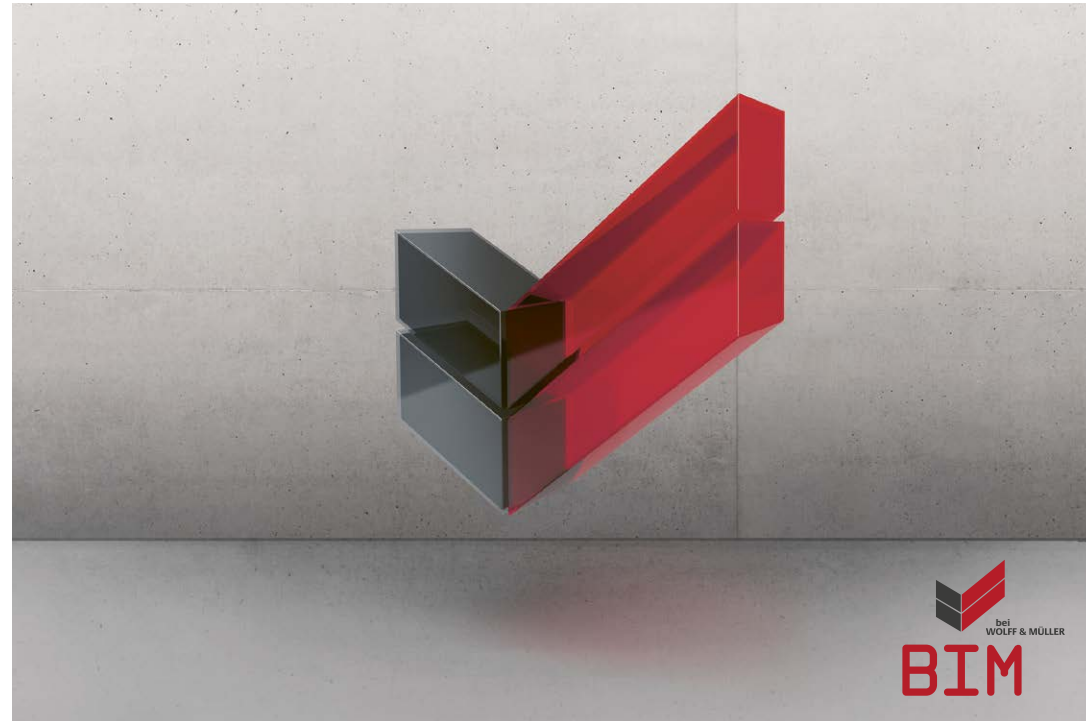

THE CONSTRUCTION PARTNER PORTAL

To facilitate implementation of the Construction Partner Principle, we have set up our Construction Partner Portal to **make it easier for all partners to share and update important information**. For instance, our construction partners can log in to this portal to send us documents. By launching this fast and simple method of communicating, we have greatly improved the effectiveness of our collaboration with construction partners.

BUILDING INFORMATION MANAGEMENT

At WOLFF&MÜLLER, the abbreviation BIM stands for more than just Building Information Modeling – we understand it to mean full-blown Building Information Management. That's because we're not talking about just a virtual building data model, but basically about the **fully-integrated management of information** throughout the entire product life cycle of a building: from planning through construction to its usage. Digital information management enables us to significantly optimize and better coordinate our construction process and the associated support processes. And to build more effectively and innovatively in partnership with you.

SELECTED PROJECTS

We are proud of how **many regular clients** we have and likewise of our **long-standing construction partnerships**. They are the best proof of the fact that joint and sustainable success is built on **quality and dependability**. The projects depicted here represent just a small selection of our many success stories. We would be delighted to have an opportunity to tell you more about the specific challenges of these and many other construction projects and the compelling solutions devised by WOLFF & MÜLLER.

WORKING WITH PASSION

According to a representative survey conducted by **Focus, Xing and kununu**, WOLFF & MÜLLER was voted **Germany's Best Employer 2018** in **four different categories** (Construction, Careers, Training & Development) across all branches of industry. As a family business, we attach great importance to providing optimum working conditions, plenty of space for creative freedom, and great opportunities for continued professional development. Our own in-house **human resource development department** and **WOLFF & MÜLLER Academy** are more than ample proof of this claim.

THE WOLFGANG DÜRR FOUNDATION

For us, building with passion also means **helping with passion**. The Wolfgang Dürr Foundation was founded in memory of **Senator e. h. Wolfgang Dürr**, who led WOLFF&MÜLLER with great dedication and vision until his death in 2003. Totally in keeping with his spirit, this nonprofit organization is especially active in the fields of **environmental and climate protection, children's welfare, education, and health**.
